Harshada Jagtap

Full Stack Web Developer

PROFESSIONAL SUMMARY

Full Stack Web Developer with 2 years of experience at YourDOST, specializing in front-end and mobile development using Angular, React, and Flutter. Holds a Bachelor of Engineering degree in Computer Science. Proficient in React, Redux, JavaScript, HTML/CSS, MongoDB, Node.js, Git, and Flutter. Known for strong collaboration, creative resolution, and articulation. Completed a Full Stack Web Development Program at Masai School. Notable academic project: Clone of Clockify, focusing on user authentication and time tracking

WORK EXPERIENCE

YourDOST

Software Development Engineer

December 2022–present

Job responsibilities:

- Specialized in web and mobile interface development with Angular, React, and Flutter, delivering responsive and high-performing applications that meet user needs across various devices and platforms.
- Enhanced user features and platform performance for mental health support, leading to a 20% increase in user engagement and a 15% reduction in load times, significantly improving the overall user experience.
- Revitalized core sections of the platform, including the 'Home page' and 'All experts page,' using React, leading to a notable 25% increase in user navigation efficiency and enhanced overall engagement metrics.
- Designed and developed an internal platform for counselors with real-time chat functionality powered by Firebase, streamlining communication and enhancing the effectiveness of counselor-client interactions.
- Implemented amplitude events to monitor and analyze user journeys, providing valuable insights that improved application analytics and informed data-driven decisions to optimize user engagement.

PROJECTS

1. Clone of Clockify | [🌐](#) | [📱](#)

JavaScript | React | Redux | Express.js | Node.js | HTML5 | CSS3 | MongoDB | Git

- Collaborated with team members to integrate authentication using JWT, ensuring secure access to the application.
- Constructed frontend components using React.js and Redux to enable project time tracking and task management.
- Designed and manipulated database models in MongoDB to efficiently store and query user data.
- Ensured seamless integration between frontend and backend for enhanced user experience.
- Managed collaborative development using Git.

2. Clone of Orbitz | [🌐](#) | [📱](#)

JavaScript | HTML5 | CSS3

- Created a responsive travel planning website using JavaScript, HTML, and CSS.
- Prepared user registration and booking functionalities.
- Developed a vibrant search bar to filter and reserve flights, cars, and hotel stays.
- Optimized user experience with a persistent navbar and footer.
- Focused on enhancing site navigation and access to pre-sorted travel plans and deals.
